SUMMARY

Backend-focused engineer and team lead who builds modern business applications that turn complex processes into reliable, maintainable software. Strong .NET and SQL foundation, with a pragmatic approach: understand the problem first, then design systems people can depend on.

Core skills: ASP.NET Core · C# · SQL / T-SQL · REST APIs · Angular · Business Applications · Agile · Team Leadership

EXPERIENCE

Development Team Lead

Sep 2017 — Present

Tribal Group

- Led a cross-functional development and testing team, introducing delivery-tracking processes that surfaced risks and blockers early, improving release predictability.
- Coordinated with Product Owners and other development teams to manage dependencies, resolve blockers, and maintain alignment across business and technical priorities.
- Delivered successful releases covering planned PBIs while reducing the team's bug backlog, balancing new feature delivery with ongoing product quality.
- Built the next generation of technical leadership, mentoring three developers who progressed into Development Team Lead roles and supporting junior developers in their progression to senior positions.

Senior Software Developer

Aug 2015 — Sep 2017

Tribal Group

- Designed and developed .NET applications, APIs, and T-SQL data layers for complex business workflows, delivering maintainable solutions that supported evolving product requirements and business needs.

Team Lead

Jan 2014 — May 2015

Lendsoft Solutions Inc.

- Led a four-person development team within a larger delivery organization, managing change requests for an existing product and coordinating priorities to keep work moving.
- Significantly reduced the backlog of pending change requests by improving work prioritization, addressing blockers, and keeping the team focused on completing outstanding requests.

Software Programmer

Jun 2013 — Dec 2013

Condor POS Solutions RP Inc.

- Designed and implemented a new product feature using ASP.NET MVC, introducing the framework into a product suite previously built primarily on traditional ASP.NET and establishing a new development approach for the application.

Software Developer

Mar 2013 — Jun 2013

RealPage, Inc.

- Contributed features for a global property-technology product within established engineering and release practices.

.NET Software Engineer

Nov 2007 — Dec 2012

Pointwest Technologies

- Developed .NET solutions across multiple enterprise projects, including a long-term engagement involving real-time processing of credit-card transactions and targeted SMS/email marketing campaigns for participating merchants.
- Led one of the development teams for approximately two years, coordinating technical delivery and supporting the team in meeting project requirements and deadlines.

IT Head / Thesis Coordinator / Instructor

Jun 2000 — Oct 2007

STI College

- Led campus IT operations while teaching Computer Science and guiding student thesis projects.

EDUCATION

Bachelor's degree, Computer Science · STI College Legazpi
