

Byron Baleda

Development Team Lead | Hands-on Software Engineer | Backend & Business Applications

Based in the Philippines · Open to global remote clients

Backend-focused engineer and team lead who builds modern business applications that turn complex processes into reliable, maintainable software. Strong .NET and SQL foundation, with a pragmatic approach: understand the problem first, then design systems people can depend on.

EXPERIENCE

Development Team Lead

Sep 2017 – Present

Tribal Group

- Lead a 6-person cross-functional team (4 developers, 2 QA) within a multi-team product organization, introducing delivery-tracking processes that surface risks and blockers early and improve release predictability.
- Mentor developers into stronger technical leadership — including three who progressed into Development Team Lead roles — and support juniors toward senior positions.
- Drive quality improvement across the broader product organization, delivering planned release scope while reducing defect backlog; team's quality-improvement work was internally recognized across the product organization.

Senior Software Developer

Aug 2015 – Sep 2017

Tribal Group

- Designed and developed .NET applications, APIs, and T-SQL data layers for complex business workflows, delivering maintainable solutions that supported evolving product requirements.
- Built APIs and data models that stayed reliable as product scope and business needs expanded.

Team Lead

Jan 2014 – May 2015

Lendsoft Solutions Inc.

- Led a 4-person development team delivering client software under real project timelines and changing priorities.
- Unblocked engineers, coordinated delivery, and kept quality high across active workstreams.

Earlier roles

2013

Condor POS Solutions RP Inc. · RealPage, Inc.

Software Programmer and Software Developer roles delivering ASP.NET MVC and property-technology product features within established delivery practices.

.NET Software Engineer

Nov 2007 – Dec 2012

Pointwest Technologies

- Designed and delivered .NET solutions for enterprise clients across multi-year engagements.
- Led a development team for approximately two years, coordinating technical delivery while strengthening backend work in APIs, business logic, and data access.

IT Head / Thesis Coordinator / Instructor

Jun 2000 – Oct 2007

STI College

- Led campus IT operations while teaching Computer Science and guiding student thesis projects.

SELECTED WORK

Independent product work

FinDen — Local-first personal finance for Android and web (Kotlin, React, TypeScript).

FleetPilot — Local-first trucking management prototype (Angular, TypeScript, IndexedDB).

ShiftBoard — Local-first employee scheduling prototype (React, TypeScript, IndexedDB).

EDUCATION

Bachelor's degree, Computer Science

STI College Legazpi

SKILLS

ASP.NET Core

ASP.NET

ASP.NET MVC

C#

SQL / T-SQL

REST APIs

Angular
